

We are a well-established, physician-owned nephrology medical practice seeking a dynamic **Chief Executive Officer** to guide our next chapter of operational excellence and sustainable growth.

Headquartered in historic **Savannah, GA**—with additional offices in **Hilton Head Island, SC, Beaufort, SC, Bluffton, SC, Jesup, GA** and **Brunswick, GA**—our 11-physician group enjoys a strong clinical reputation, loyal patient base across the scenic Lowcountry, and prime locations in one of the Southeast's most desirable regions. Savannah offers world-class historic charm, vibrant arts/culture, beaches nearby, mild year-round weather, and a cost of living significantly below many major metros—making it an exceptional place for professionals and families to thrive.

Like many independent practices in 2026, we're navigating rising overhead (staffing, IT, admin burdens) and reimbursement challenges. This is a high-impact CEO opportunity for a business leader ready to deliver measurable improvements while enjoying an enviable lifestyle.

Key responsibilities include:

- Implementing aggressive yet sustainable overhead reduction and profitability strategies
- Optimizing multi-site operations, revenue cycle, vendor contracts, staffing, and workflows
- Driving strategic initiatives for efficiency, growth, and potential value-based care alignment
- Collaborating closely with physician owners to balance business discipline with clinical priorities
- Leading a lean, collaborative team in an entrepreneurial, physician-centric environment

We're seeking a candidate who:

- Holds an **MBA** (strongly preferred) or equivalent, with 5+ years in healthcare operations, practice management, consulting, or small/medium business turnaround
- Demonstrates proven P&L ownership, cost control, performance improvement, and financial acumen
- Thrives in hands-on, nimble settings (away from corporate bureaucracy)
- Is excited about relocating to (or already enjoys) the coastal Southeast—think historic Savannah charm, Hilton Head beaches, Beaufort's riverside appeal, and Brunswick's Georgia coast access

- Values physician autonomy and wants visible, direct impact on both financial health and patient care

This leadership role offers competitive compensation with performance incentives, in a region boasting strong quality of life, growing job markets, and lower living costs than Atlanta or coastal Florida hubs.

If you're a strategic operator ready to run the show at a high-potential independent practice in one of the country's most livable areas, let's connect.

Apply via this post by sharing your resume via email with [TRotureau@thekidneydocs.com](mailto:TRotureau@thekidneydocs.com) and a brief example of a cost-reduction or operational turnaround success.

Referrals from healthcare MBAs, practice executives, and Lowcountry professionals welcome—help us find our next leader!
